How to use the Hardwood Frames Wholesale Cost Per Foot Chart

- Each hardwood profile in the catalog has a letter code
- Find the Wholesale Cost Per Foot Price Chart by Code on pages 4 and 5 of this booklet.
- Choose the desired wood and finish
- Cost per foot does not include oversized or special mill charges
- 6 foot minimum footage on all profiles except AR Line and CF 404 and CF 405 have 4 foot minimum.

Example CT 102 Cherry Rosewood = \$21.65 per foot

See Custom Finish Chart for Finish Categories

Some large wood profiles in these price code categories cannot be milled from highly figured woods such as Fishtail Oak, Birdseye Maple, Tiger Maple, Quartersawn White and Rift Sawn Oak. Depending on the profile, many can be made using veneers or gluing wood boards together to show the best wood figure. We recommend you call us to discuss the options for the profile you want to order, and to get the correct cost per foot.

4' Minimum on CF 404 and CF 405 and AR Profiles
6' Minimum on all other profiles

Some large wood profiles in these price code categories cannot be milled from highly figured woods such as Fishtail Oak, Birdseye Maple, Tiger Maple, Quartersawn White and Rift Sawn Oak. Depending on the profile, many can be made using veneers or gluing wood boards together to show the best wood figure. We recommend you call us to discuss the options for the profile you want to order, and to get the correct cost per foot.

Frequently Asked Questions about ASF Hardwood Frames

Question	Answer
Can I order ASF frames in length or chop ?	No. All ASF frames are Finished Corner frames
Can I order a frame in a different wood and finish from my sample?	Yes. Except for our Jumbo size profiles, our profiles can be milled from the 12 wood species we currently offer.
Does the same stain look the same on all wood species?	No. Depending on the color of unfinished wood, the finish look of the frame will vary. For example, Maple Rosewood will look lighter than Mahogany Rosewood. It may even vary within the same species because of color variations in the raw wood. ASF makes very effort to be consistent with all our finishes. We encourage you to send us your sample if an exact color match is required.
Can profiles be altered in shape ?	Yes. Frames can be altered in width and depth. Special Mill charges may apply.
Can you copy a molding?	Yes. New milling knives may need to be ordered. There is a charge to have knives made.
What is a Strainer frame?	A strainer frame is an interior support frame, used to give greater strength and stability for thin face profiles or large frame sizes. If a profile in our catalog is pictured with a strainer frame, the cost of the strainer is included in the cost per foot charge. Strainers frames can be ordered separately.
Can a strainer frame be milled to different depths ?	Yes. See ASF Special Services Cost per Foot Chart for details and standard sizes.
What is a Cleated Strainer ?	For oversize frames a strainer can be made with a chamfered edge to mate with a wood wall cleat to securely hang on the wall.. See ASF Special Services for details and diagrams.
Can I order spacers to match my frame?	Yes. Spacers can be ordered to match your frame. All spacers are milled with extra footage and cut long for trimming down. An extra stick is included for mistakes. See ASF Special Services for details and sizes
Do you make Double-Sided frames?	Yes. See ASF Special Services Cost per Foot Chart for details.
Do you have a minimum footage for a frame order?	Yes. We have a 6 foot minimum on all frames with the exception of a 4 foot minimum on our Artist Line (AR) profiles and two Canvas Floater (CF) profiles, CF 404 and CF 405.
What are Oversize Charges ?	Oversized Charge is an additional surcharge to cover the cost of milling wood from select stock, free of blemishes and perfectly straight.
What is the normal turnaround time for a frame?	3 Weeks for wood frames with standard finishes. Gold leaf and special projects will take longer.
Can I pay extra to Rush my frames?	Yes. The faster you need your frame the higher the Rush Charge . See ASF Special Services Cost Per Foot Chart for details.
Can you Gold Leaf your moldings?	Yes. See ASF Special Services Cost per Foot Chart for details.
Why do you offer wood veneers ?	ASF offer highly figured musical instrument grade veneers that can be applied to profiles where solid hardwood frames may not be available. See ASF Special Services Cost per Foot Chart for details.
If a wood or finish has been discontinued , what should I do with the samples?	Please discard your samples. ASF is always working on new profiles and finishes. We encourage you to call and ask about the new profiles and finishes we are now offering.

ASF Flat Iron Frames

Welded Bar Steel on top of a wood substrate.
Steel is attached to the wood with decorative screws or also available without screws.

Wood can be milled to different height upon request.

Also available without screws.

No Screw Option

A nut is tack welded to the underside of the bar steel and the wood substrate is bolted in place.

Flat Iron Cost Per Foot Price Chart 6 Foot Minimum

The ASF Flat Iron™

This profile is a combination of bar steel and wood.

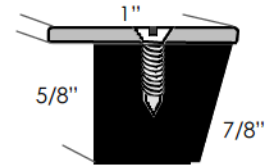

The wood base can be milled to different depth to accommodate deep works of art.

Flat

No Screw Option

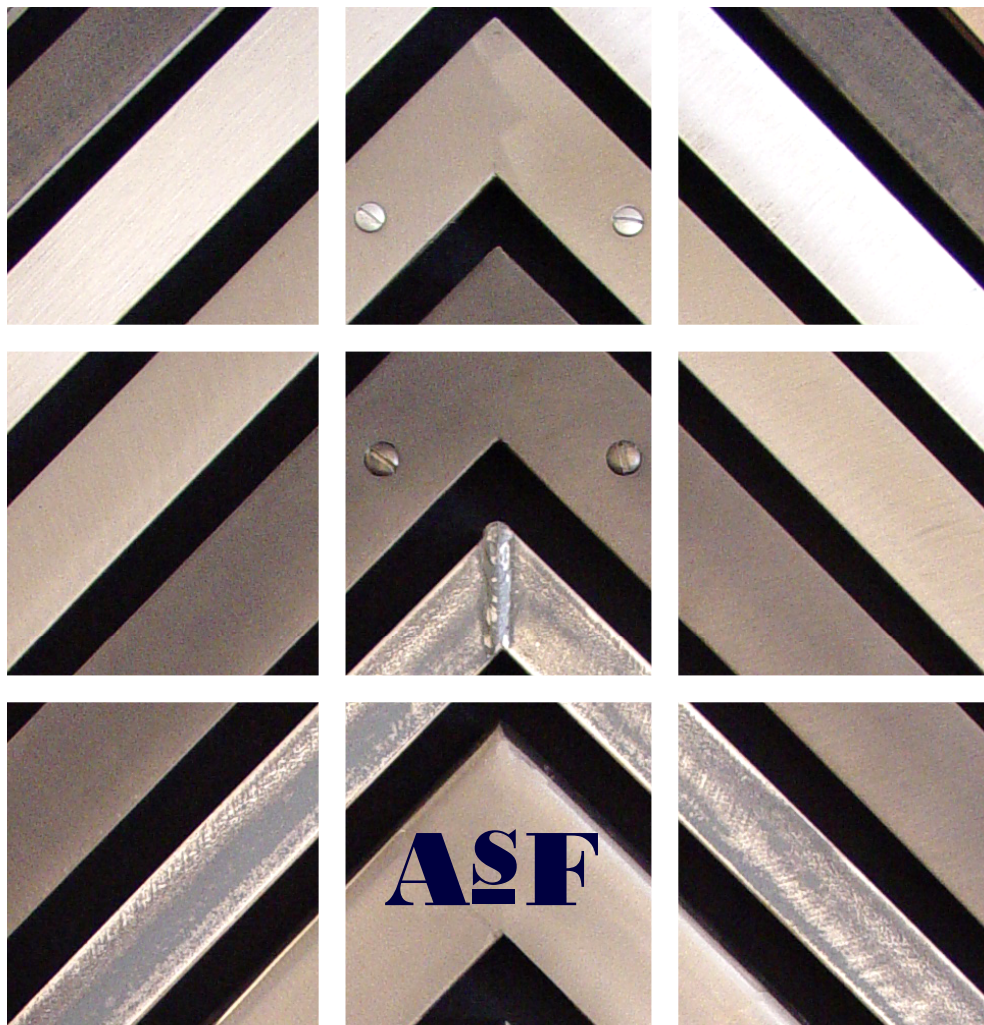

No Screw Option

A nut is tack welded to the underside of the bar steel and the wood substrate is bolted in place.

Frequently Asked Questions about Welded Steel and Flat Iron Frames

Question	Answer
How do I order a Welded Steel Frame?	A frame is a combination of three things. Profile # , Grinding Pattern , & Finish . For example, WS 600 Ground Gunmetal , WS 600 is the profile , <i>Ground</i> is the grinding pattern , and Gunmetal is the finish .
Can grinding patterns be applied to all profiles?	In all but a few cases, all grinding patterns are available on Welded Steel (WS) and Flat Iron (FI) profiles.
How are Welded Steel frames constructed?	ASF Welded Steel (WS) and Flat Iron Frame (FI) are made from cold rolled angle iron and cold rolled bar steel. They are cut to size and the corners welded.
How do I put the corners together?	All ASF Welded Steel frames are finished corner frames. They are ready to fit.
Are Welded Steel frames extremely heavy?	No , unless it is very oversized, standard wall hangers can be used to hang welded steel frames. Framed mirrors may require a hanging system.
How can I secure artwork in a steel frame?	All steel frames are fitted with a wood rabbet and you can fit them like any wood frame.
How can I attach my canvas in a Welded Steel Floater Frame (WS 605 & WS 607)	ASF will drill holes in the steel around the back of the frame. Tell us the orientation of the frame - (Horizontal or Vertical) and holes will be drilled for hanging hardware.
Can Welded Steel Frames rust ?	All frames are sprayed with a special lacquer that protects the frame from air and normal humidity. There is a Stainless Steel option.
How durable is a Welded Steel finish?	The surface of a Welded Steel frame must be handled as gently as any lacquer finish.
How are the finished colors achieved?	The special lacquer that protects the frame from air and normal humidity can be tinted to achieve the color specified on your sample.
Can I touch up a scratch?	No . If a frame is scratched, the proper way to repair the damage is to send the frame back to us for refinishing.
What is a Raw finish?	When metal stock comes to us from the steel mill it has a blue scale on the surface. The surface is untouched and the welded bead is showing in the corners. The surface may rust over time depending on the environment.
Can steel frames be used outside ?	No . They are for indoor use only.
Can steel frames be used in a bathroom?	High humidity and water may affect the finish over time. We recommend steel frames to be in a dry environment.
Can I alter the shape of an angle iron steel profiles?	The shapes in our catalog are stock profiles from the steel mill. A few profiles we have specially made for us. A request for a special profile will require a quote.
Can steel frames be made deeper ?	The Flat Iron Series (FI) was created to allow for this very purpose. Flat Iron frame are made of welded bar steel on top of a wood substrate. The substrate can be milled deeper to accommodate deeper works of art. There is a special mill charge to alter the depth of a Flat Iron frame.
Can I order a Flat Iron (FI) frame without screws in the face of the profile?	Yes . The screws hold the bar steel to the wood substrate. The No Screw Option requires a nut to be tack welded to the back of the steel and the wood substrate is bolted to the bar steel from the back. This requires more labor and an additional cost per foot charge.
Can I change the screw design in a Flat Iron (FI) frame?	Yes , unless specified otherwise your Flat Iron (FI) frame will come with the screw that is on your sample. You can request a different design. See page 9 for screw / bolt options.
Can I request a decorative screw in a WS angle iron frame?	Yes . Please specify type and position.
What grinding patterns shows the welded bead in the corner of the frame?	Raw and Industrial grinding pattern.

A Street Frames Welded Aluminum Frames

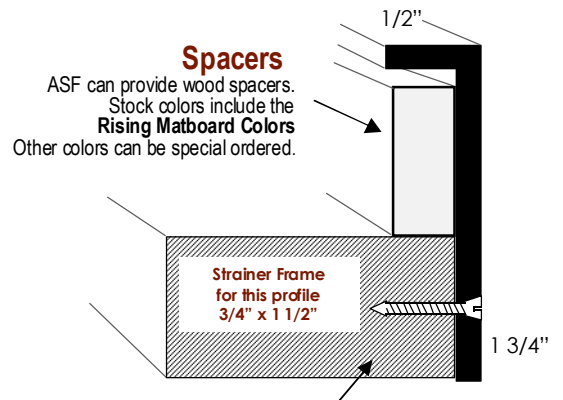

Available in Brushed and Frosted Grinding Patterns
and select Powder Coat Finishes

Notes When Ordering Welded Aluminum Frames

- ◆ 8' Minimum on AL Frames
- ◆ **Wood Spacers can be ordered with your frame.**
 - ◆ Strainer depths can be special ordered
- ◆ **Special Milling is possible for many profiles**
 - ◆ Ask about profiles not shown in catalog

Sample Sets Are Available

Standard AL Frames

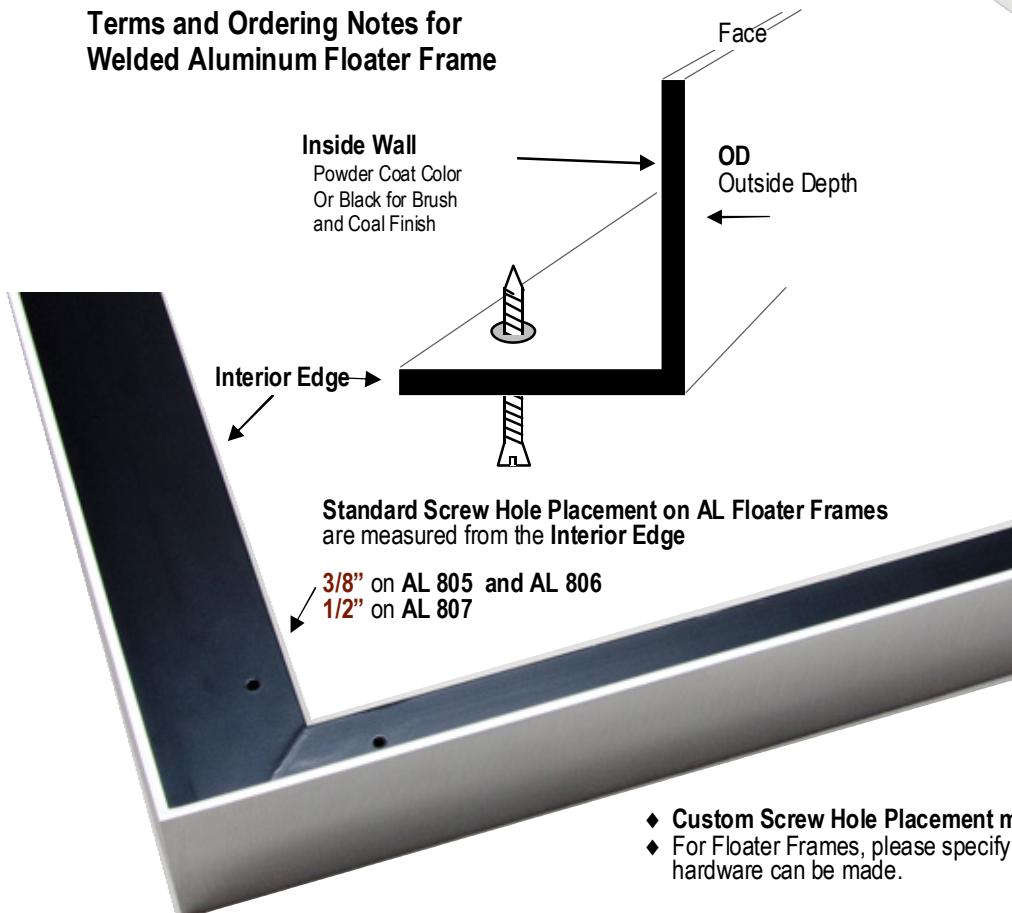

Strainer and Screw Hole Placement on Standard AL Frames

AL profiles have a default strainer size and screw placement for each profile. You can order different strainer depths when placing your order.

Custom Screw Hole Placement
must be specified at time of frame order

Terms and Ordering Notes for Welded Aluminum Floater Frame

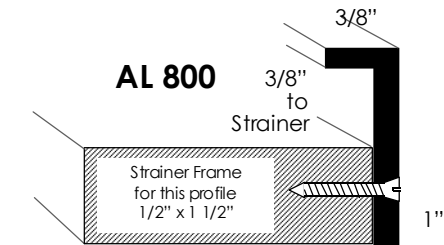

ASF

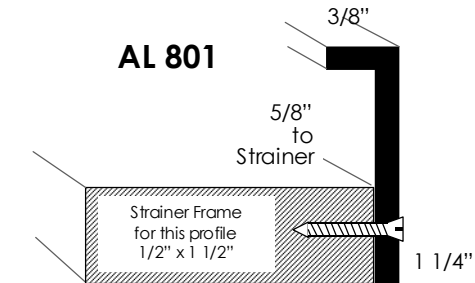

Master Framemakers Since 1981

- ◆ **Custom Screw Hole Placement** must be specified at time of frame order
- ◆ For Floater Frames, please specify orientation when ordering so holes for hanging hardware can be made.

Flat Aluminum Profiles

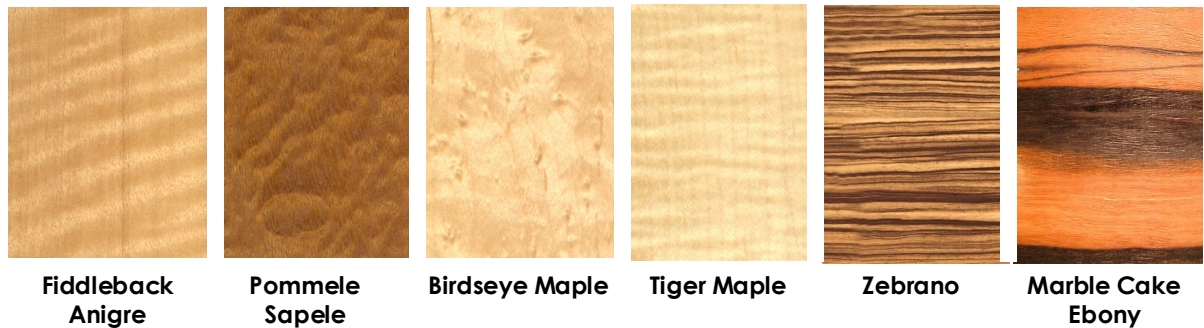

Introducing our newest collection at ASF – Flat Aluminum. This line of frames blends the industrial look of welded aluminum with the classical element of exotic instrument grade veneers to create a unique effect for even the most discerning of clientele. The mix of these elements allows you to use these mouldings in many different artistic applications!

8 foot minimum on FA Profiles

- Available Options
- Flat Bar Aluminum can be Powder Coated
 - Solid Hardwood Sides and finishes are available on request
 - Profiles can be made into a Canvas Floater
 - Frame modifications can be made

FA Profiles come with a 3/4" Strainer

Frequently Asked Questions about Welded Aluminum Frames

Question	Answer
How do I order a Welded Aluminum Frame? AL Series	A frame is a combination of two things: Profile # and Surface Finish . For Example: AL 800 Cardinal White , AL 800 is the profile, Cardinal White is the surface finish.
How do I order a Flat Aluminum Frame? FA Series	A Flat Aluminum frame is a combination of four things: Profile # , Surface Finish, Veneer and Stain. Standard Flat Aluminum is offered with two different face options: Frosted and Brushed . Powder Coat Finishes are available. See the cost per foot chart for available finishes.
How are Welded Aluminum frames constructed?	ASF Welded Aluminum Frames (AL / FA) are made from angle or bar aluminum. They are cut to size and the corners welded. The corner weld is ground flat, and your chosen finish is then applied.
How do I put the corners together?	All ASF frames are finished corner frames. They are ready to fit.
How can I secure artwork in a aluminum frame?	Aluminum frames come with a strainer frame or a wood rabbet, and can fit them like any wood frame.
How can I attach my canvas in a Welded Aluminum Floater Frame (AL805, AL 806 AL 807, AL 816, AL 817 & AL 818)	ASF will drill holes in the aluminum around the back of the frame. Tell us the orientation of the frame - (Horizontal or Vertical) and holes will be drilled for hanging hardware.
How durable is a Welded Aluminum frame?	Aluminum is a soft metal and should be handled with care.
Can I touch up a scratch?	No. If a frame is scratched, it needs to be refinished by us. Please call and we will determine the best way to address the problem.
Can I alter the shape of a welded aluminum profiles?	A request for a special profile will require a quote.
Minimum Footage for Aluminum Frames	8 Foot Minimum on AL Profiles and 6 Foot Minimum on FA Profiles.
